ILLEGAL BORDER CROSSING IS BECOMING EXTREMELY DANGEROUS

ILLEGAL ALIENS MISSING IN DESERT

(Reported on 7-28-01)

El Centro, CA – The U.S. Border Patrol believe as many as 60 illegal aliens from Mexico are missing in the California desert where temperatures are exceeding 120 degrees Fahrenheit.

Mexican border agents alerted U.S Border Patrol agents that they believe a large group to people may be lost in the desert after finding one dead woman and four other people suffering from exposure on the Mexican side of the border.

Officials believe that as many as three separate groups of 20 or greater attempted to cross the border near Mexicali in the same general area on Monday and Wednesday. This particular area exhibits summer temperatures that exceed 120 degrees and is extremely difficult to traverse. No water is found in this area.
